

## Acqui Terme , 22<sup>nd</sup> March 2015 World Water Day's Celebration@Sources

On the occasion of World Water Day, which will be held on Saturday, March 22, the City of Acqui Terme as a member of the EHTTA Association (European Association of Historic Thermal Towns) and Cultural Route of the Council of Europe, will participate in the water celebrations of "**Celebration @ Sources**", carried out in the framework of the European culture project SOURCE. Every European historic thermal town, part of the Association EHTTA organizes initiatives to promote and raise awareness on water issues in all its forms, to celebrate our most precious resource: water the leitmotif of human existence.

Water is life, a treasure which should be safeguarded, saved and not wasted and every March 22 since 1992, the United Nations Organization and the whole world dedicate to it a day to sensitize all of us to a responsible management of this good.

The City Council and EHTTA have turned to the boys, as special interlocutors, as they represent the future, banishing a photo contest aimed at students of the city primary and secondary schools. The photographs will undoubtedly pay tribute to water as a raw material and element, of tactile and visual sensations, of images and emotions often inextricably linked.

The award ceremony of the photo contest will take place on **March 22 at 15:00** at the **Grand Hotel Terme Nove "Sala Liberty"**, where they will be projected photographs of the participants and to each class participant will receive a diploma for the participation, the winning classes will instead be assigned a set of teaching materials.

Afterwards there will be a concert of harp and violin entitled "**Acquae Vitae**" by the **Association Mozart 2000**, where the melodies of the water will be interpreted by the violin of Maestro Alessandro Buccini and the harp and Eleonora Perolini. Pure water, clear, transparent, it will be

the perfect metaphor of music as the sound of the water itself is a sweet and gentle music in a mountain stream, impetuous and dramatic in a waterfall or in a snowstorm.

Citizens are invited to attend the event; the town of Acqui Terme is synonymous water and therefore it could not but pay homage!

**The photographs will also be available directly on Instagram using the hashtag #celebrationsources. On page [www.facebook.com/celebrationsources](http://www.facebook.com/celebrationsources) follow the activities of the European Thermal Towns for the water celebration day.**
